\* The odometer reading at time of check is derived from either a physical inspection prior to export from Japan, mileage at IVA type approval inspection or mileage recorded on first UK MOT.

\*\* Some data sources in Japan always round up the recorded mileage reading.

For example, a mileage reading of 72001 kms could be rounded up to 73000 kms. The BIMTA mileage check therefore, allows for this difference in reading in its verification audit.
